

Before you invest, you may want to review the Gotham Enhanced 500 ETF (the “Fund”) statutory prospectus and statement of additional information, which contain more information about the Fund and its risks. The current statutory prospectus and statement of additional information dated January 28, 2025 are incorporated by reference into this Summary Prospectus. You can find the Fund’s statutory prospectus, statement of additional information, reports to shareholders, and other information about the Fund online at www.GothamETFs.com/GSPY. You can also get this information at no cost by calling at 855-998-4779 or by sending an e-mail request to info@gothametfs.com.

Investment Objective

The Gotham Enhanced 500 ETF (the “Fund”) seeks long-term capital appreciation.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.

Annual Fund Operating Expenses¹ (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.65%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.65%
Less: Fee Waiver	(0.15)%
Total Annual Fund Operating Expenses After Fee Waiver²	0.50%

¹ The Fund’s investment adviser, Tidal Investments LLC (“Tidal” or the “Adviser”), a Tidal Financial Group company, will pay, or require a sub-adviser to pay, all expenses incurred by the Fund (except for advisory fees and sub-advisory fees, as the case may be) excluding interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940, as amended, (the “1940 Act”), and litigation expenses and other non-routine or extraordinary expenses (collectively, the “Excluded Expenses”).

² The Adviser has agreed to reduce its unitary management fee (which includes all expenses incurred by the Fund except for Excluded Expenses) to 0.50% of the Fund’s average daily net assets through at least January 31, 2026. To the extent the Fund incurs Excluded Expenses, Total Annual Fund Operating Expenses After Fee Waiver will be greater than 0.50%. This agreement may be terminated only by, or with the consent of, the Board of Trustees (the “Board”) of Tidal ETF Trust (the “Trust”), on behalf of the Fund, upon sixty (60) days’ written notice to the Adviser. This Agreement may not be terminated by the Adviser without the consent of the Board.

Expense Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. The management fee waiver discussed above is reflected only through January 31, 2026. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$51	\$193	\$347	\$796

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the expense example above, affect the Fund’s performance. For the fiscal year ended September 30, 2024, the Fund’s portfolio turnover rate was 144% of the average value of its portfolio.

Principal Investment Strategies

The Fund is an actively-managed exchange-traded fund (“ETF”) that seeks to achieve its investment objective by generally investing in securities of issuers included in the S&P 500[®] Index (the “Index”). The Fund is not a passive index fund, but instead utilizes an “enhanced” strategy implemented by Gotham Asset Management, LLC, the Fund’s investment sub-adviser (“Gotham” or the “Sub-Adviser”), to invest in the securities in the Index and weight those securities based on the Sub-Adviser’s assessment of value and each security’s weight in the Index.

The Sub-Adviser seeks to capitalize on pricing inefficiencies in the market by employing a systematic, bottom-up, valuation approach based on the Sub-Adviser’s proprietary analytical framework to identify companies included in the Index that appear to be undervalued or overvalued on both an absolute and relative basis. This approach consists of:

- Researching and analyzing each company in the Index according to a methodology that emphasizes fundamentals such as recurring earnings, cash flows, capital efficiency, capital structure, and valuation;
- Identifying and excluding companies that do not conform to the Sub-Adviser’s valuation methodology or companies judged by the Sub-Adviser to have questionable financial reporting;
- Updating the Sub-Adviser’s analysis based on company earning releases, annual (Form 10-K), and quarterly (Form 10-Q) reports and other corporate filings; and
- Recording the Sub-Adviser’s analysis in a centralized database enabling the Sub-Adviser to compare companies and identify securities to purchase based on the Sub-Adviser’s assessment of value.

The Fund is generally rebalanced daily in order to manage risk and reposition the portfolio to reflect earnings releases, stock price movements, and other new information related to particular companies.

Principal Investment Risks

The principal risks of investing in the Fund are summarized below. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund’s net asset value per share (“NAV”), trading price, yield, total return, and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the section in the Fund’s Prospectus titled “Additional Information About the Fund - Principal Risks of Investing in the Fund.”

Equity Market Risk. The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks, such as those primarily held by the Fund, are generally exposed to greater risk than other types of securities, such as preferred stocks and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.

General Market Risk. Securities markets and individual securities may increase or decrease in value. Security prices may fluctuate widely over short or extended periods in response to market or economic news and conditions, and securities markets also tend to move in cycles. If there is a general decline in the securities markets, it is possible your investment may lose value regardless of the individual results of the companies in which the Fund invests. The magnitude of up and down price or market fluctuations over time is sometimes referred to as “volatility”, and it can be significant. In addition, different asset classes and geographic markets may experience periods of significant correlation with each other. As a result of this correlation, the securities and markets in which the Fund invests may experience volatility due to market, economic, political or social events and conditions that may not readily appear to directly relate to such securities, the securities’ issuer or the markets in which they trade.

Value Style Risk. The Sub-Adviser buys securities, on behalf of the Fund, that it believes are undervalued. Investing in “value” stocks presents the risk that the stocks may never reach what the Sub-Adviser believes are their full market values, either because the market fails to recognize what the Sub-Adviser considers to be the companies’ true business values or because the Sub-Adviser misjudges those values. In addition, value stocks may fall out of favor with investors and underperform other stocks (such as growth stocks) during given periods. The Fund’s performance may be negatively affected if the Sub-Adviser determines (or otherwise needs) to sell a value stock before the market recognizes the stock’s full value.

Database Errors Risk. The investment strategy used by the Sub-Adviser relies on proprietary databases and third-party data sources. Data entries made by the Sub-Adviser’s team of financial analysts or third parties may contain errors, as may the database system used to store such data. Any errors in the underlying data sources, data entry or database may result in the Fund acquiring or selling investments based on incorrect information.

Systems Risk. The Fund depends on the Sub-Adviser to develop and implement appropriate systems to provide sub-advisory services. The Sub-Adviser relies extensively on computer programs and systems to implement and monitor the Fund’s investment strategy. As a result, there is a risk of human or technological errors affecting the portfolio construction process and order origination, including errors in programming (e.g., “bugs” and classic coding errors), modeling, design, translational errors and compatibility issues with data sets and among systems. There can be no guarantee that such defects or issues will be identified in time to avoid a material adverse effect on the Fund.

High Portfolio Turnover Risk. The Fund may actively and frequently trade all or a significant portion of the securities in its portfolio. A high portfolio turnover rate increases transaction costs, which may increase the Fund’s expenses. Frequent trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains.

Large-Capitalization Investing Risk. The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

Sector Risk. At times the Fund may increase the relative emphasis of its investments in a particular sector or group of industries. The prices of securities of issuers in a particular sector may be more susceptible to fluctuations due to changes in economic or business conditions, government regulations, availability of basic resources or supplies, or other events that affect that industry or sector more than securities of issuers in other industries and sectors. To the extent that the Fund increases the relative emphasis of its investments in a particular industry or sector, the value of Shares may fluctuate in response to events affecting that industry or sector. As of September 30, 2024, 28.1% of the Fund’s net assets were invested in the technology sector.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Sub-Adviser’s success or failure to implement investment strategies for the Fund. In addition as an actively-managed fund, the Fund’s investment exposure to individual securities will not match those of the Index and the Fund’s performance may not correlate with the performance of the Index.

Recent Market Events Risk. U.S. and international markets have experienced and may continue to experience significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including uncertainty regarding inflation and central banks’ interest rate changes, the possibility of a national or global recession, trade tensions, political events, armed conflict, war, and geopolitical conflict. These developments, as well as other events, could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets, despite government efforts to address market disruptions.

ETF Risks.

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as “Authorized Participants” or “APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
- *Trading.* Although Shares are listed on a national securities exchange, such as the NYSE Arca, Inc. (the “Exchange”), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s

underlying portfolio holdings, which can be significantly less liquid than Shares. Also, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings. These adverse effects on liquidity for Shares, in turn, could lead to wider bid/ask spreads and differences between the market price of Shares and the underlying value of those Shares.

Performance

The following performance information provides some indication of the risks of investing in the Fund by showing changes in the Fund’s performance over time. The bar chart shows the annual returns for the Fund year over year. The table illustrates how the Fund’s average annual total returns for the 1-year and since inception periods compare with those of a broad measure of market performance. The Fund’s past performance, before and after taxes, does not necessarily indicate how it will perform in the future. Updated performance information is available on the Fund’s website at www.GothamETFs.com/GSPY.

During the period of time shown in the bar chart, the Fund’s highest quarterly return was 11.00% for the quarter ended December 31, 2023 and the lowest quarterly return was -15.42% for the quarter ended June 30, 2022.

Average Annual Total Returns For the Periods Ended December 31, 2024

	1 Year	Since Inception December 28, 2020
Return Before Taxes	23.67%	13.34%
Return After Taxes on Distributions	23.43%	13.12%
Return After Taxes on Distributions and Sale of Fund Shares	14.19%	10.55%
S&P 500® Index (reflects no deduction for fees, expenses, or taxes) ⁽¹⁾	25.02%	13.71%

⁽¹⁾ The S&P 500® Total Return Index is a widely recognized unmanaged index of 500 common stocks, which are generally representative of the U.S. stock market as a whole. The returns provided for the S&P 500® Total Return Index include the reinvestment of dividends.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates during the period covered by the table above and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Shares through tax-deferred or other tax-advantaged arrangements such as an individual retirement account (“IRA”).

Management

Investment Adviser

Tidal Investments LLC, a Tidal Financial Group company, serves as investment adviser to the Fund.

Investment Sub-Adviser

Gotham Asset Management, LLC serves as investment sub-adviser to the Fund.

Portfolio Managers

Joel Greenblatt, Managing Principal and Co-Chief Investment Officer for the Sub-Adviser, is responsible for the day-to-day management of the Fund and has been a portfolio manager of the Fund since its inception in 2020.

Robert Goldstein, Managing Principal and Co-Chief Investment Officer for the Sub-Adviser, is responsible for the day-to-day management of the Fund and has been a portfolio manager of the Fund since its inception in 2020.

Michael Venuto, Chief Investment Officer for the Adviser, oversees trading and execution for the Fund and has been a portfolio manager of the Fund since its inception in 2020.

Charles A. Ragauss, CFA, Portfolio Manager for the Adviser, oversees trading and execution for the Fund and has been a portfolio manager of the Fund since its inception in 2020.

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the “Deposit Securities”) and/or a designated amount of U.S. cash.

Shares are listed on a national securities exchange, such as the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the “bid” price) and the lowest price a seller is willing to accept for Shares (the “ask” price) when buying or selling Shares in the secondary market. This difference in bid and ask prices is often referred to as the “bid-ask spread.”

Recent information regarding the Fund’s NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund’s website at www.GothamETFs.com/GSPY.

Tax Information

Fund distributions are generally taxable to shareholders as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an IRA or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser, the Sub-Adviser, or their affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training, or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.
